

Trenwyth Sustainable Solutions

For decades, designers nationwide have relied on Trenwyth to provide the highest quality premium architectural concrete masonry units in custom shapes, sizes and colors you won't find anywhere else.

Recognized for our customization, wide color range and short lead times, Trenwyth is also known for creating sustainable, high performance environments.

- Our high thermal mass concrete masonry walls have a significant impact on the reduction of energy consumption. Trenwyth concrete masonry walls remain warm or cool long after the heat or air-conditioning is turned off. This effectively reduces heating and cooling loads, shifting them to off-peak hours and, therefore, reducing environmental and economic impact associated with excessive energy use.

- Trenwyth concrete masonry units are mold and moisture resistant, avoiding the exposure of potentially hazardous pollutants that may adversely affect the air quality for building occupants.
- To inspire creative, functional and enduring Green buildings, we offer an array of products that contain a significant amount of recycled content: Astra-Glaze-SW+® glazed masonry units, Verastone® ground face and Verastone® Plus filled and polished masonry units, as well as Acousta-Wal® sound-absorbing masonry units.

Trenwyth products may earn your building up to 5 LEED® credits (see chart). For more information, call Trenwyth at 800-233-1924.

Your Building May Earn LEED® Points with Trenwyth Sustainable Solutions

LEED POINT CATEGORY	LEED CREDIT	LEED CREDIT DESCRIPTION	LEED POINTS	TRENWYTH SUSTAINABLE SOLUTIONS
Materials & Resources	MR 4.1	Recycled Content	1 pt.	Trenwyth recycled cmu contains 38% pre-consumer recycled content by weight. Determined by weight, the total recycled content (the sum of the post-consumer recycled content + 1/2 of the pre-consumer recycled content) must constitute 10% based on the cost of the total value of the all materials used on the project.
Materials & Resources	MR 4.2	Recycled Content	1 pt.	Trenwyth recycled cmu contains 38% pre-consumer recycled content by weight. Determined by weight, the total recycled content (the sum of the post-consumer recycled content + 1/2 of the pre-consumer recycled content) constitutes an additional 10% (20% total) based on the cost of the total value of the all materials used on the project.
Materials & Resources	MR 5.1	Regional Materials	1 pt.	Trenwyth regionally extracted, processed and manufactured materials. 10% (based on cost) of the total materials have been extracted, processed and manufactured within 500 miles of the project site.
Materials & Resources	MR 5.2	Regional Materials	1 pt.	Trenwyth regionally extracted, processed and manufactured materials. An additional 10% beyond Credit MR 5.1 (total of 20%, based on cost) of the total materials have been extracted, processed and manufactured within 500 miles of the project site.
Indoor Environmental Quality	Credit 4.1	Low Emitting Materials: Adhesives & Sealants	1 pt.	Trenwyth's factory-applied and field coat ground face and filled & polished ground face sealant emit low VOC's, therefore, reducing indoor air contaminants that are odorous, irritating and/or harmful to the comfort and well-being of installers and occupants.
